

Munro Complete BOOST

Tired of pop-up sprinklers that don't pop? Frustrated with reduced irrigation performance due to expanding neighborhood or over-taxed domestic water? Boost that pressure with the new Munro Complete BOOST. Get a professional look, feel and result with a simple to use self-contained pressure boost pump system. After integrating into your existing irrigation system, the Complete BOOST will add needed pressure anytime the system is flowing above 5 gpm.

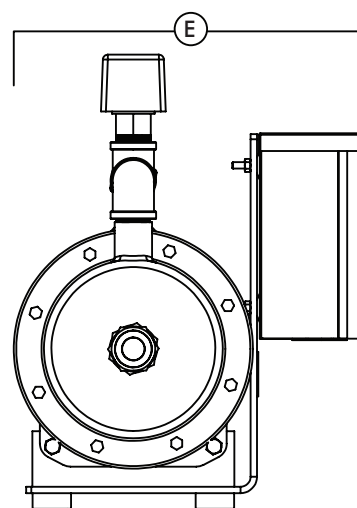

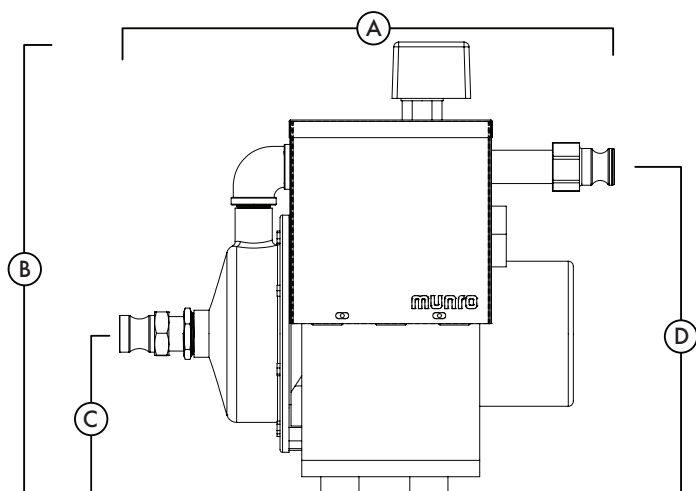

COMMON APPLICATIONS

Irrigation Pressure Boost – Domestic Water

ADVANTAGES

Easy to install – Simple plug-n-go installation provides a fast and convenient way to boost everyday pressure to your irrigation system when other water demands reduce performance.

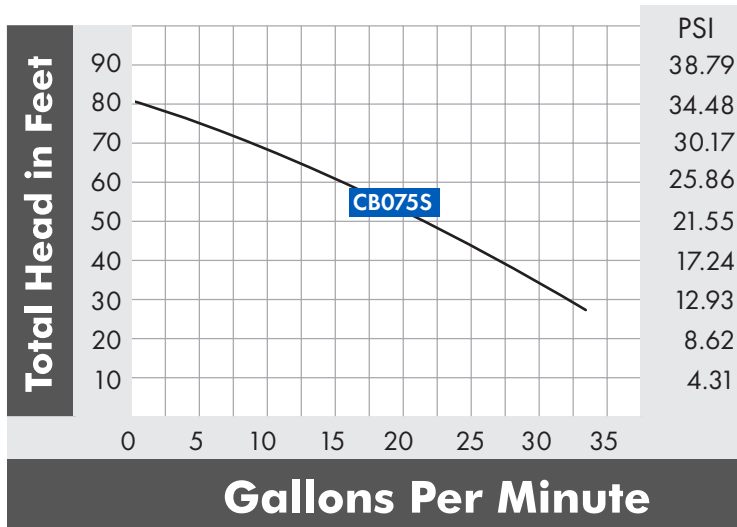

Quality Components – Munro commits to using only quality components, the Complete BOOST is no exception. This stainless steel pump is designed to provide a longer life, and ensures easy maintenance and hassle-free serviceability.
