

MUNRO HELPS DELIVER RELIABLE IRRIGATION INFRASTRUCTURE FOR A GROWING COMMUNITY

Problem

Frontier Family Park is a major community investment for the Town of Queen Creek, AZ, designed to provide recreational opportunities for residents and visitors for years to come.

To support the park's landscape irrigation needs, the project team required a dependable pumping solution backed by experienced partners.

- Following installation and initial start up, a remote water well serving the site began to fail, introducing fine sand into the water supply.
- The highly turbid water created operational issues within the pumping station's filtration system, requiring immediate troubleshooting and support.

Solution

Munro partnered with J2 Design, the contractor, and project stakeholders to provide a packaged pumping station tailored to the project's requirements. Munro's scope included:

- CAD drawings and CSI specifications
- Equipment selection
- Fabrication and assembly
- Factory testing
- Start up and commissioning
- On-site troubleshooting and support

OUTCOME

Through close collaboration and responsive field support, the project team overcame challenging water conditions to deliver reliable irrigation infrastructure for Frontier Family Park.

- Designed to support a valued community asset and serve the Town of Queen Creek for years to come.
- Reliable irrigation infrastructure delivered through proactive problem-solving and strong project collaboration.

**Implementing a Munro pump station costs less than you think, and will save time and money.
