

## RP1010T22

10HP, 230V, 3Ph, 26.8A, 361lbs.

- **Abrasion-Resistant Mechanical Shaft Seal** - Protects the motor for longer life
- **Impeller Flow Guide Vane** - Increases efficiency and lowers operating cost
- **Stainless Steel Outer Case** - Durable and low maintenance

### COMMON APPLICATIONS

- **Recommended for** - River and waterfall style water features
- **Other uses** - Large volume water transfer, flood control, extraction of water, flood irrigation, tail water recycling

### ADVANTAGES

- **Much Higher than Average Flow to Horsepower** – Using an axial and mixed flow design, the RP large volume pumps live up to their billing. The proof is in our curves - you'll see maximum flow at low head levels
- **Continuous Duty Design** – These pumps are made to run! Our double casing design takes the flow path across the motor housing to whisk away the heat generated by the motor. A cool motor means a longer life
- **Low Cost to Operate** – These pumps are at their most efficient at full flow. Other pumps can not make that claim

**MUNRO RP1010T22 Pump**
