# Get to Know Our Pump Stations

**COMPLETE PRO II**  
Small Project Pro Solution

Entry-level packaged pump station for small projects. Provides all-in-one pump, on/off control and vandal-resistant enclosure at an economical price. Suction lift or pressure boost configurations.

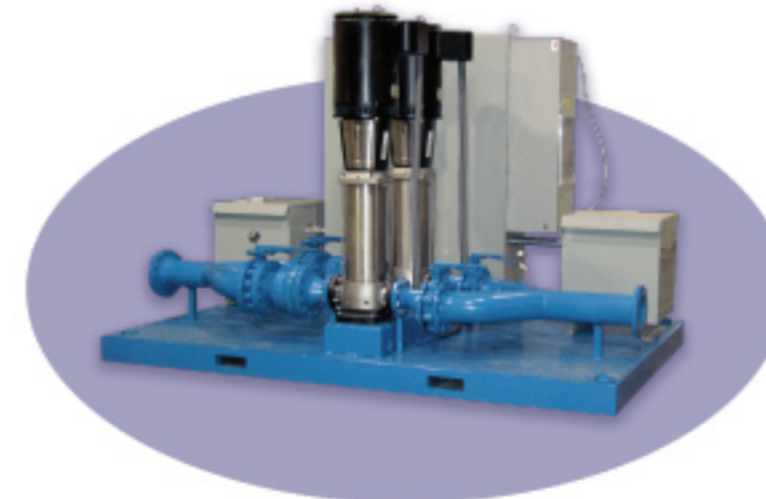

**SIMPLICITY**  
Professional-Grade Pump  
Stations for Smaller Flows

Incorporating the latest VFD controls, the self-contained Simplicity stations bring many of the capabilities of larger stations to projects with smaller flows. Suction lift or pressure boost. True soft start and stop, constant pressure with VFD. Quick ship capability.

**STANDALONE**  
Loaded with Features,  
Fastest Delivery

Unmatched blend of features, performance, and quick delivery, make this our popular pump station package. We've loaded it with all of the must-have features for today's projects, making it easiest to select and specify. StandAlone's rapid production allows for quick turnarounds and budget-friendly pricing. Selection and specification is quick and simple. Munro WebView available for remote monitoring.

**CUSTOM**  
Tailored Solutions to Your  
Project's Requirements

Some projects are totally unique. Munro has the solutions. Our custom stations are engineered and built to meet unique and specialized requirements. No matter the challenge, we can develop a reliable, high-performance pump solution, and we can integrate advanced filtration, telemetry, enclosures and more – plus, make it fit to unique installation parameters too.
